

CYBERSEC ADVANCED VULNERABILITY REPORT

Executive Summary

Key	Value
Total CVEs Found	16
Critical	0
High	0
Medium	0
Low	0
Informational	0
Unknown	0

System Information

Key	Value
os	Microsoft Windows 11 Home Single Language
os_version	10.0.22631
build_number	22631
architecture	AMD64
hostname	TARS
ip_address	192.168.227.1
boot_time	2026-02-22 19:09:14.658906

Windows Details

Key	Value
OS	{'WindowsProductName': 'Windows 10 Home Single Language', 'WindowsVersion': '2009', 'OsBuildNumber': '22631'}
Hotfixes	['KB5066133', 'KB5027397', 'KB5068865', 'KB5068070']

Installed Software	['Proton Drive', 'Python 3.12.0 Standard Library (64-bit)', 'MySQL Documents 8.0', 'Microsoft Teams Meeting Add-in for Microsoft Office', 'Python 3.12.0 Test Suite (64-bit)', 'Python 3.13.0 Add to Path (64-bit)', 'Python 3.13.0 Standard Library (64-bit)', 'Python 3.13.0 Tcl/Tk Support (64-bit)', 'Python 3.12.0 Documentation (64-bit)', 'Python 3.13.0 Development Libraries (64-bit)', 'Python 3.12.0 Core Interpreter (64-bit)', 'OpenSSL 3.4.0 (64-bit)', 'Python 3.13.0 Core Interpreter (64-bit)', 'Python 3.13.0 pip Bootstrap (64-bit)', 'Python 3.12.0 Add to Path (64-bit)', 'Python 3.13.0 Executables (64-bit)', 'Python 3.12.0 Executables (64-bit)', 'Python 3.12.0 Development Libraries (64-bit)', 'Python 3.12.0 pip Bootstrap (64-bit)', 'MySQL Examples and Samples 8.0', 'Python 3.12.0 Tcl/Tk Support (64-bit)', 'Python 3.13.0 Documentation (64-bit)', 'Python 3.13.0 Test Suite (64-bit)', 'Office 16 Click-to-Run Extensibility Component', 'Office 16 Click-to-Run Licensing Component', 'UE Prerequisites (x64)', 'MySQL Workbench 8.0 CE', 'Node.js', 'Microsoft Visual C++ 2010 x64 Redistributable - 10.0.40219', 'Microsoft Visual C++ 2013 x86 Minimum Runtime - 12.0.40664', 'Microsoft Visual C++ 2010 Redistributable - x86 10.0.40219', 'Microsoft GameInput', 'iCloud Outlook', 'Microsoft Visual C++ 2008 Redistributable - x86 9.0.21022 False', 'MySQL Installer - Community', 'Microsoft Visual C++ 2012 x86 Minimum Runtime - 11.0.50727 False', 'vcpp_crt.redist.clickonce', 'vs_communitymsires', 'Microsoft Visual C++ 2008 Redistributable - x86 9.0.30729.4048 False', 'Microsoft Visual C++ 2012 x86 Additional Runtime - 11.0.50727 False', 'Microsoft Visual C++ 2005 Redistributable - x86 8.0.59193 False', 'HP Software Framework', 'Microsoft Visual C++ 2012 x86 Minimum Runtime - 11.0.60610', 'Microsoft Visual C++ 2013 x64 Minimum Runtime - 12.0.40664', 'Microsoft Visual C++ 2022 X64 Additional Runtime - 14.42.34438', 'MySQL Shell', 'Flixmate', 'Java 8 Update 421', 'Java 8 Update 411 (64-bit)', 'J... CVE & CVSS Vulnerability Data

CVE ID	Description	CVSS Score	Severity	Published
CVE-2024-37391	ProtonVPN before 3.2.10 on Windows mishandles the drive installer path, which should use this: "" + ExpandConstant("{autopf}\Proton\Drive") + "" in Setup/setup.iss.	7.8	HIGH	N/A
CVE-2017-8622	Windows Subsystem for Linux in Windows 10 1703 allows an elevation of privilege vulnerability when it fails to properly handle handles NT pipes, aka "Windows Subsystem for Linux Elevation of Privilege Vulnerability".	7.8	HIGH	N/A
CVE-2018-0743	Windows Subsystem for Linux in Windows 10 version 1703, Windows 10 version 1709, and Windows Server, version 1709 allows an elevation of privilege vulnerability due to the way objects are handled in memory, aka "Windows Subsystem for Linux Elevation of Privilege Vulnerability".	7.0	HIGH	N/A
CVE-2018-8441	An elevation of privilege vulnerability exists due to an integer overflow in Windows Subsystem for Linux, aka "Windows Subsystem for Linux Elevation of Privilege Vulnerability." This affects Windows 10, Windows 10 Servers.	7.8	HIGH	N/A
CVE-2018-8329	An Elevation of Privilege vulnerability exists in Windows Subsystem for Linux when it fails to properly handle objects in memory, aka "Linux On Windows Elevation Of Privilege Vulnerability." This affects Windows 10, Windows 10 Servers.	7.8	HIGH	N/A
CVE-2019-0682	An elevation of privilege vulnerability exists due to an integer overflow in Windows Subsystem for Linux, aka 'Windows Subsystem for Linux Elevation of Privilege Vulnerability'. This CVE ID is unique from CVE-2019-0689, CVE-2019-0692, CVE-2019-0693, CVE-2019-0694.	7.8	HIGH	N/A

CVE-2019-0689	An elevation of privilege vulnerability exists due to an integer overflow in Windows Subsystem for Linux, aka 'Windows Subsystem for Linux Elevation of Privilege Vulnerability'. This CVE ID is unique from CVE-2019-0682, CVE-2019-0692, CVE-2019-0693, CVE-2019-0694.	7.8	HIGH	N/A
CVE-2019-0692	An elevation of privilege vulnerability exists due to an integer overflow in Windows Subsystem for Linux, aka 'Windows Subsystem for Linux Elevation of Privilege Vulnerability'. This CVE ID is unique from CVE-2019-0682, CVE-2019-0689, CVE-2019-0693, CVE-2019-0694.	7.8	HIGH	N/A
CVE-2019-0693	An elevation of privilege vulnerability exists due to an integer overflow in Windows Subsystem for Linux, aka 'Windows Subsystem for Linux Elevation of Privilege Vulnerability'. This CVE ID is unique from CVE-2019-0682, CVE-2019-0689, CVE-2019-0692, CVE-2019-0694.	7.8	HIGH	N/A
CVE-2019-0694	An elevation of privilege vulnerability exists due to an integer overflow in Windows Subsystem for Linux, aka 'Windows Subsystem for Linux Elevation of Privilege Vulnerability'. This CVE ID is unique from CVE-2019-0682, CVE-2019-0689, CVE-2019-0692, CVE-2019-0693.	7.8	HIGH	N/A
CVE-2019-1185	An elevation of privilege vulnerability exists due to a stack corruption in Windows Subsystem for Linux. An attacker who successfully exploited the vulnerability could execute code with elevated permissions. To exploit the vulnerability, a locally authenticated attacker could run a specially crafted application. The security update addresses the vulnerability by correcting how Windows Subsystem for Linux handles objects in memory.	7.3	HIGH	N/A
CVE-2017-8627	Windows Subsystem for Linux in Windows 10 1703, allows a denial of service vulnerability due to the way it handles objects in memory, aka "Windows Subsystem for Linux Denial of Service Vulnerability".	4.7	MEDIUM	N/A

CVE-2017-8703	The Microsoft Windows Subsystem for Linux on Microsoft Windows 10 1703 allows a denial of service vulnerability when it improperly handles objects in memory, aka "Windows Subsystem for Linux Denial of Service Vulnerability".	5.5	MEDIUM	N/A
CVE-2018-0334	A vulnerability in the certificate management subsystem of Cisco AnyConnect Network Access Manager and of Cisco AnyConnect Secure Mobility Client for iOS, Mac OS X, Android, Windows, and Linux could allow an unauthenticated, remote attacker to bypass the TLS certificate check when downloading certain configuration files. The vulnerability is due to improper use of Simple Certificate Enrollment Protocol and improper server certificate validation. An attacker could exploit this vulnerability by preparing malicious profile and localization files for Cisco AnyConnect to use. A successful exploit could allow the attacker to remotely change the configuration profile, a certificate, or the localization data used by AnyConnect Secure Mobility Client. Cisco Bug IDs: CSCvh23141.	4.8	MEDIUM	N/A
CVE-2018-8337	A security feature bypass vulnerability exists when Windows Subsystem for Linux improperly handles case sensitivity, aka "Windows Subsystem for Linux Security Feature Bypass Vulnerability." This affects Windows 10, Windows 10 Servers.	5.3	MEDIUM	N/A
CVE-2019-0553	An information disclosure vulnerability exists when Windows Subsystem for Linux improperly handles objects in memory, aka "Windows Subsystem for Linux Information Disclosure Vulnerability." This affects Windows 10 Servers, Windows 10, Windows Server 2019.	5.5	MEDIUM	N/A
